Verified Reviews 9,4/10

STRETCH FILM WRAPPING MACHINES

If your priority is to ship your products by courier or on pallets, safely, without damage and without sacrificing aesthetics you should consider our wrapping machines.
For over 40 years, we have been producing standard and special stretch film wrapping machines for boxes, pallets, carts, doors and reels.

In addition to the classic rotary table machines with various sizes and capacities, we manufacture special packaging systems, such as the incredibly robust patented FPWD with a rotating arm and our innovative FP BOX for boxes, parcels, containers, vases, and tires.
Our catalog also includes machines with recess tables loadable with pallet trucks, battery-powered self-propelled machines, and machines that allow you to weigh the pallet. We have all types of stretch film available in stock.

Stretch film wrapping

SEALING MACHINES FOR BAGS, SACKS AND TUBES

Our catalog of " sealing machines " includes equipment of all types and sizes that allow us to find the most suitable solution for each sealing challenge. We offer free trials at our facility, ensuring the actual effectiveness of the solution even with the most challenging sealing materials. In our inventory, we have impulse sealers, "constant temperature" sealers, and ultrasonic sealers. For large-scale production, you can choose models with continuous sealing and integrated conveyor belts.

Our catalog includes:
Manual, semi-automatic and continuous sealers
Impulse and hot-bar sealers
Special versions for bags with pressure closure and bag marking
Portable clamp sealers

Bags and sacks sealing machines

VACUUM PACKAGING MACHINES AND HEAT SEALERS

Vacuum technology is mainly used in the food sector to lengthen the shelf life of products, but we have many customers who also use it in the technical sector to protect metal and electronic parts.
Our staff is particularly knowledgeable about both sectors (technical and food) to advise you on the best solution.

Our catalog includes:
Vacuum machines with or without MAP
Heat sealers for trays
External suction and chamber-type vacuum machines
Trays and film
Vacuum bags, also suitable for cooking.

Vacuum machines

Thermosealers

TAPING MACHINES AND CARTON ERECTORS

Do you need to safely and quickly form and close cardboard boxes? We have many models of both semiautomatic with operator and automatic taping machines for packaging lines. We design and assemble the entire complete line of box formers, box sealers, box weight checking systems, strapping machines and marking equipment.
We manufacture high-quality printed adhesive tapes specifically designed for use on taping machines.

Our catalog includes:
Semi-automatic and automatic taping machines
Semi-automatic taping lines
Semi-automatic and automatic erectors
Customized taping lines
Standard, special and customized tapes
Eco-friendly paper tapes.

Taping machines and carton erectors

STRAPPING WITH PLASTIC STRAP

Lightweight and safe, plastic strapping allows for the quick and convenient bundling of packages and pallets. Compared to steel strapping, it is a safer and easier-to-handle solution for operators. Plastic strapping is suitable for securing both boxes, packages, and even large and heavy pallets. It prevents the tipping of packages during transportation and can be printed on to minimize the risk of theft during transit.

Our catalog includes:
Manual strapping tools with seal
Battery-operated or pneumatic vibrating strapping tools
Semi-automatic and automatic machines for boxes or pallets
Printed, manual or automatic strapping

Plastic strapping

Textile strapping

STRAPPING WITH METAL STRAP

Are you required to handle or package heavy or bulky products? Metal strapping is the safest and most robust solution, as it not only offers high tensile strength but also provides an anti-cutting solution for products with sharp edges. For outdoor applications, we can offer solutions using GALVANIZED or STAINLESS steel strapping. We provide robust and highly reliable strapping tools and solutions, offering repairs directly at our facility.

Our catalog includes:
Manual strapping tools with seal and interlocking
Pneumatic strapping tool
Seal and interlocking closures
Galvanized, shiny and blued strap
Seals

Stainless steel strapping

Metal strapping

HEAT SHRINK EQUIPMENT

Heat shrinking equipment and machines are used for shrinking plastic films around the packages of technical and food products to protect them from dirt and dust and enhance their aesthetic appeal. Shrink film is also used around palletized loads to improve their stability and protect them from water, greasy dust and dirt. They are divided into portable manual appliances or semi-automatic and automatic shrink wrapping machines.

Our catalog includes:
Electric or gas-powered manual devices
Manual and semi-automatic heat shrink chambers
Automatic heat shrink systems
L-sealers with heat shrink tunnels
Heat shrink film in rolls or sheets

Heat shrink equipment

MANUAL AND ELECTRO-PNEUMATIC GLUERS

The sealing of cardboard boxes and the assembly of details in plastic, fabric and other materials is completed by choosing from multiple gluing machines that use sticks or granules and cylinders.
Our catalog includes both entry-level models and professional models such as the LCD PC PRO which allows precise regulation of the glue, reaching up to 250°C, minimizing operator errors and glue strings.

We have available in stock:
Glue applicators of all types for stick and granule
Spray glue applicators and with special nozzles
Glue dispensing systems
Melting units
Special and highly adhesive glues
Tank cleaning system with wax

Manual and electro-pneumatic gluing machines

SEWING MACHINES FOR NETS, BAGS AND FABRICS

Our precise and reliable stitching machines allow for chain stitching closure of various sewable products such as bags, nets, and sacks.
We offer models suitable for high-volume production as well as models suitable for occasional use. Thanks to battery-powered versions, we can ensure operation even in environments where 220-volt power supply is not available, such as fields, farms, or large warehouses.

AUTOMATIC BANDING MACHINES

Banding machines are useful for bundling printed products such as brochures, flyers, and printed catalogs. They can also be used to bundle products for promotional or multi-pack sales. They are available in tabletop models or with support and an enlarged coil holder for high-volume production.

Sewing machines

Banding machines

EYELETTING MACHINES FOR BAGS AND HEADERS

We manufacture, modify and assemble eyeletting machines suitable for the precise and rapid application of small and large eyelets on bags of pasta, biscuits, trays, etc.
Eyelets can be applied individually or in pairs with manual hand or lever-operated eyeletting machines or with more professional models with mechanical or pneumatic foot pedals. Call us, and depending on your production needs, we can recommend the best solution.

Our catalog includes:
Manual clamps or lever eyeletting machines
Mechanical pedal eyeletting machines - single or double
Pneumatic pedal eyeletting machines - single or double
Stainless steel eyelets eyeletting machines
Presses for applying eyelets to tarpaulins and banners

Bags eyeletting machines

VERTICAL DOSERS AND BAGGING MACHINES

Our wide range of feeders allows our customers to dose food and technical products such as granules, powders, liquids, pastes and creams. We also handle the bagging of the products, which can be done manually, semi-automatically, or automatically, including bag closing and lot and expiration date marking. We also have packaging machines for supermarkets designed to package bags at the entrance, used by the "security" department.

Our catalog includes:
Volumetric feeders and load cells
Pneumatic feeders for creams and sauces
Auger feeders for flours and powders
Vibrating channel feeders for granular products
Vertical and supermarket bagging machines

Bagging machines Dosers

PROFESSIONAL TYING MACHINES

Need a closure with clips, aluminum seals, or resealable seals? Our tying machines are used on bags of cookies, pasta, panettone, confectionery, and technical products. We have ready-to-deliver elastic cord tying machines, specific hog pliers for gabions, twistband tying machines, airtight hog pliers for mozzarella bags, battery-powered hog pliers for nets and bags, and pneumatic closing systems.

Our catalog includes:
Elastic wire binding machines
Twistband and clipband machines (reclosable closures)
Aluminum plate sealing machines (safety fasteners)
Compressed air and battery-operated hog pliers
Airtight sealing machines (e.g., for mozzarella)
Seals, clips and elastic thread

Elastic thread

Twistband Clipband Hog pliers

THERMAL TRANSFER AND INKJET MARKERS

In the food and cosmetics industry, product traceability and expiration marking is essential to avoid disputes and the withdrawal of large quantities of product from the market in case of problems on a batch.
We have the right marking solution for every specific need. Give us a call or visit us, and one of our representatives will show you both thermal transfer solutions with solid inked rollers and faster inkjet solutions.

Our catalog includes:
Manual thermal transfer markers
Thermal transfer rotary markers
Inkjet markers with print height 12.7 mm
Inktet markers with print height 25.4 mm
Inkjet markers for packaging lines

Thermal transfer and inkjet markers

BOX STAPLERS AND FIXERS

We offer various solutions for fastening points, nails, and staples on wood and plastic in manual, electric, pneumatic, and battery-powered versions. Staplers are suitable for fastening materials such as wood, rubber, plastic, and cardboard, while models with a clincher allow for stapling and clinching, for example, to seal the flaps of boxes. We also have all the strip and coil nailers suitable for construction and the assembly of wooden frames and crates.

Our catalog includes:
Standard and clinching staplers
Fasteners for brads and pins
Fasteners for plastic staples
Strip and coil nailers
Box sealing staplers

Staplers Nailers Tackers

PROFESSIONAL CUTTERS AND ROLL HOLDERS

We design and manufacture specific roll holders and cutters solutions for unwinding and cutting rolls weighing from 50 to 300 Kg and diameters up to 1000 mm. The width of the rolls to be cut can go up to 3000 mm, and we can also make roll holders with up to 8 overlapping rolls. Thanks to models with brakes or assisted systems, we minimize the effort required by the operator.

Our catalog includes:
Horizontal or vertical cutters
Double horizontal cutters
Workbenches with cutters
Wall-mounted cutters
Cardboard corners cutter
Roll holders with freewheel or brake

Cutters and roll holders

PROTECTIVE EQUIPMENT AND MATERIALS

Protecting your products can be actively pursued through various solutions, such as cardboard packaging scraps (made with cardboard shredders), paper, and air bubble rolls. Since there are several solutions, we recommend contacting us to explain your actual needs. We will advise you on both traditional and more environmentally friendly solutions.

Our catalog includes:
Air cushion machines
Cardboard shredding machines
Hopper for styrofoam peanuts
Kraft paper dispenser
Ecological solutions

Cardboard shredders and air cushions

Equipment for protective materials

MAINTENANCE, STORAGE AND CLEANING

With our solutions, you can easily keep your workshop and warehouse organized and safe. We can provide you with the best bins, safety cabinets, industrial forklift brooms, maintenance baskets, including quiet compressors and furniture lifters. In the "warehouse equipment" section, you can find all the useful products for warehouses, industries, and companies.

Our catalog includes:
Industrial brooms for cleaning yards and industries
Magnetic brooms for collecting metal scraps
Safety cabinets for different materials
Baskets for maintenance
Silenced and professional compressors
Outdoor plastic boxes with padlock

Industrial brooms

Maintenance and storage

TIPPING BUCKETS AND OPENING BOTTOM BOXES

Sort, empty and manage processing waste safely and quickly, respecting both environmental and workplace safety laws.
Use the tipping buckets for scraps and choose between models in iron, galvanized steel, plastic and equipped with an assisted tipping system to avoid kickbacks and dangerous operations.
The buckets can be designed for front tipping or bottom door opening, allowing you to comfortably sit on the forklift in a safe position.

Our catalog includes:
Metal tipping buckets
Polyethylene tipping buckets
Metal boxes with opening bottom
Boxes with opening bottom and single or double door

Tiltable buckets

Opening bottom caissons

PLASTIC AND METAL BINS AND CONTAINERS

If you are looking for sturdiness, practicality and reliability for the storage of technical, food or waste, you can rely on our wide range of bins. We have plastic models and iron models and we cover all requirements of load and product type. We manufacture special large-sized bins and bins for specific purposes, such as storing batteries, neon lamps, and outdoor storage.

Our catalog includes:
Plastic industrial and food crates
Plastic food boxes
Specific caissons for battery or neon storage
Airtight metal containers
Mesh metal containers
Tool containers

Metal containers

Plastic bins

REEL AND BOXES LIFTERS

Handling, reliability and customisation are the strengths of our box and reel lifters.
The load capacity of the simplest trolleys is up to 400 kg and they can reach maximum heights of up to 2500 mm.
Heavier and more robust forklifts can handle loads of up to 1200 kg, ensuring stability and high reliability. They are highly customizable with various accessories, and the operation can be manual or electric. We also produce counterbalanced models and configure them according to the customer's specific work needs.

Our catalog includes:
Lifters with manual lifting
Lifters with battery-operated lifting
Manual and electric counterweighted lifters
Trolleys with reel holders and with special accessories

Box and reel lifters

MANUAL, ELECTRIC PALLET TRUCKS AND LIFTERS

We have many suitable solutions for handling palletized loads inside warehouses and logistics centers. Manual and battery-powered pallet trucks with load capacities from 1000 to 3000 kg and manual and electric stackers for pallets with load capacities from 1000 to 1400 kg. We also have and design models with fast lifting, widened or adjustable forks, and custom-made forks according to specific needs. We manufacture pallet trucks with special dimensions and load capacities.

Our catalog includes:
Hand pallet trucks
Custom made pallet trucks
Pallet trucks with capacity 2500-3000 kg
Electric pallet trucks
Manual and electric stackers

Pallet trucks and lifters

SAFETY AND CONTAINMENT TANKS

Handling and storing IBCs, drums, and containers carries the risk of content leakage into the environment. Their storage must be carried out following the current regulations to avoid environmental pollution, content dispersion within the company, disputes, and fines. All our containers and bins are certified. Metal and plastic basins are available in metal or polyethylene and have capacities ranging from 70 to 1000 liters. We also have lockable containers for safe outdoor storage.

Our catalog includes:
Holding tanks for 1 or 2 cisterns
Drum and tank racks and tanks
Metal and plastic liquid-proof containers

IBCs tanks

Drums tanks

DRUMS HANDLING AND STORAGE

Drums containing liquid or paste products must be handled and stored with specialized equipment to ensure the safety of the operator and the working environment. We have various solutions that can be installed on forklifts or used independently as carts, platforms and stackers.

Our catalog includes:
Wheeled bases and drum trolleys
Drum clamps
Drum tilters for forklift forks
Lifters with integrated drum tilter
Manual drum lifting pliers
Trolleys and tubs

Drums handling

LOADING HOOKS AND ROBUST CRANES

Useful for lifting and handling heavy objects such as engines, spare parts, and disassembled pieces, load hooks and cranes are particularly useful in workshops and warehouses. We have standard models in stock and we can create counterbalanced equipment with manual or battery-powered thrust. Where a forklift can be used, we can offer load hooks for forks with a capacity of up to 5000 kg.

Our catalog includes:
Folding and removable cranes
Professional cranes and hooks
Manual or electric counterweighted cranes
Manual or electric rotating cranes
Load hooks with capacity from 1000 to 5000 kg
Manual or electric rotating cranes

Cranes

Loading hooks

PLATFORMS, TROLLEYS, STORAGE AND LADDERS

We have a wide range of products for storage and handling. If you need a platform, a standard trolley, or a carrier for moving boxes and packages, we have the right product. Stainless steel versions can be used in food, humid or hospital environments. Lightweight and maneuverable aluminum ladders are available in various heights to suit your needs. The wide steps and safety rail increase operator safety.

Our catalog includes:
Aluminum ladders with steps from 3 to 12 with wide step
Single or double sided platforms
Painted or stainless steel roof racks
Platforms with mesh sides
Cylinder equipment and trolleys

Platforms

Ladders Trolleys Cylinders

WHEELED LIFTING PLATFORMS

Do you need to lift boxes with minimal effort, perform repair, assembly, and disassembly operations without straining your back by constantly bending over? Portable lifting platforms allow you to move and lift boxes and packages to different heights depending on your needs. They are available with a single or double pantograph and in painted, aluminum, or stainless steel versions. There are also battery-powered models with electric lifting and fully electric models.

Our catalog includes:
Single or double pantograph platforms
Aluminum and stainless steel platforms
Fully electric platforms

Wheeled lifting platforms

HYDRAULIC LIFTING PLATFORMS

Lifting platforms allow for the elevation of materials, even with a high weight. They are suitable for lifting pallets during palletizing and depalletizing operations, for connecting handling lines located at different heights, for lifting machinery and equipment, etc. They are available with single, double, triple, or quadruple pantographs and with capacities ranging from 1000 to 7000 kg. There are also models in stainless steel and with a lowered or U-profile for the insertion of pallet jack forks.

Our catalog includes:
Single pantograph lifting platforms
Double pantograph platforms
Large lift models with triple/quadruple pantograph
Lifts with high capacities from 1000 to 7000 kg
Models with U-shaped and low profile

Hydraulic platforms

ROLLERS AND BELTS FOR BOXES AND PALLETS

We design and manufacture handling lines for boxes or pallets with specific capacities and characteristics according to your needs. We build idle and motorized rollers, roller tables, extendable roller conveyors for entering and exiting machinery and equipment. We also design stainless steel accumulation rollers with special capacities and dimensions. Contact us for a quote and to develop a specific project.

Our catalog includes:
Idle and extendable roller conveyors
Conveyors with rubber, plastic, stainless steel and galvanized rollers
Motorized roller conveyors for pallets and boxes
Technical and food conveyor belts
Crazy and motorized curves
Roller conveyors for idle and motorized pallets
We create customized handling systems

Roller conveyors and belts for boxes and pallets

MANUAL AND AUTOMATIC WEIGHING SYSTEMS

We have a wide range of scales for weighing boxes and packages, specific models for weighing pallets and commercial scales for direct sales to the public.
We also create specific weighing systems for packaging lines according to customer needs.
Weighing systems are also implemented on pallet wrapping machines.

Our catalog includes:
Bench scales for boxes
Floor scales for boxes and bags
Platforms for weighing pallets
Weight indicators
Pallet truck scales
Dynamometers

Manual and automatic weighing systems

WORK TABLES AND STAINLESS STEEL CABINETS

Our stainless steel rotary tables allow for the accumulation of food products at the end of packaging lines, while robust stainless steel tables are suitable for food processing in environments such as butcher shops, laboratories, and stores. Tables can be configured according to customer needs and are available in various sizes. We also manufacture custom workbenches in painted steel with a nylon surface suitable for contact with food. Where necessary, we can build tables with a robust frame and increased capacities.

Our catalog includes:
Stainless steel tables without and with undertop
Stainless steel cabinet tables
Stainless steel cabinets and hoppers
Rotating accumulation tables
Sturdy industrial tables and benches

Tables and benchtops

TECHICAL/FOOD GRADE PLASTIC PALLETS

If you need to store or move goods, the use of plastic pallets can help you, both in exports and in humid, food, or pharmaceutical environments. Pallets are available in a lightweight version for small loads and a heavy-duty version for storing high-weight products or in racks.

HEATERS FOR DRUMS, CYLINDERS AND TANKS

We have a complete range of heating blankets to maintain a constant temperature inside drums, cylinders, and IBCs. Heaters are available with a maximum temperature of 40°-90°-200°C, depending on the product to be heated and the type of container. Silicone heating bands and bases to place under the drum are also available.

Drums heaters

Plastic pallets

CONSUMABLES AND SCHEDULED DELIVERIES

Are you looking for certified materials, made by reliable manufacturers with over 40 years of experience? Do you want to avoid running out of materials in your warehouse? We have materials in stock that have passed our internal quality control and practical usage tests over time. These technical choices are made to preserve machines from malfunctions and breakages and to guarantee customers the highest reliability and the best quality/price ratio. Good material prevents machine downtime, increased production costs, and problems with customers and disputes.

Our catalog includes all packaging-related consumables such as plastic strapping, metal strapping, stainless steel strapping, nails and staples, stitching wire, vacuum bags, food bags, bubble wrap and paper reels, air film reels, stretch film, eyelets, twistband and clipband wire, shrink film reels, and adhesive tape.
